since 1992

I D E N T I T Y

Window coverings are not merely functional products. They are an expression of individual style and taste. By letting your own ideas and creativity run free you can create your own world around you. A world you can relate to, that makes you and the people around you feel good. A world that is really you.

Selecting window coverings is like picking out a garment for your wardrobe. It defines your style, the way you feel and reflects who you are. With this journal, we would like to inspire you with new ideas about the amazing possibilities for creating an individual style on the window with our window coverings, whether timeless, contemporary, classical, modern or eclectic.

Through the pictures in this journal we take you on a visual journey. A journey in which you will experience the amazing effect stylish window coverings can have on the interior. For the photography in this journal we

travelled to Italy, the very birthplace of style. The three locations we selected are equally stunning, yet totally different. The historic palace, modern hide-away in the countryside and the vintage city villa we visited, each express the unique identities of their owners and are characterized by an authentic style.

We photographed a selection of fabrics from our roller blind collection, brought together in three themes: Nature, Palazzo and Vintage. The fabrics beautifully interact with their surroundings and seamlessly become part of it, while embellishing it and bringing some of our own identity into the scene.

This journal presents you with merely a hint of the endless possibilities in individual styles our window coverings have to offer, yet offers a great first glance into the amazing world of window coverings.

Enjoy and be inspired!

NATURE

The hectic, fast world we live in, makes us want to retreat in our homes. We want to turn them into a peaceful place in which we can reenergize ourselves. Create balance in the interior with natural patterns and refreshing colors.

As a response to the busy and hectic world we live in, we feel the need for peace and inspiration within the walls of our own homes; a little oasis which we can retreat to in order to rebalance and reenergize.

The roller and panel blind fabrics in our Botanic collection are inspired by nature. They radiate freshness and are subtly decorative. The designs look like a collection of souvenirs brought home from a walk through a field of flowers or deep forest.

With the fabrics, we literally bring the beauty of nature indoors, creating an inner garden in which we can feel good. By surrounding us with their freshness we get renewed energy. They make us feel clean, healthy and happy. They make it seem like the indoor and outdoor world seamlessly blend into one another.

The collection includes print fabrics and jacquards with delicate all-over flower patterns and organic designs.

The collection includes printed fabrics and jacquards, floral patterns in soft pastels and bright white fabrics with fresh color accents fabrics. The delicate flower patterns and natural shapes have been worked out in different white and beige color tones, in bright white with fresh colors, in soft pastels or deep forest colors. The patterns are fantastic, playful and organic or more abstract.

Unique in the collection is a jacquard woven fabric with print. The mix of an all-over print on a jacquard woven design gives the fabric an extraordinary look.

Apart from transparent fabrics black-out fabrics are also part of the collection. The dim-out jacquards in the collection have been provided with a special coating on the back that makes sure the design is clearly visible during the day. The fabrics in the Botanic collection have a width of 200 and 280 cm.

The water-painted floral pattern of roller blind fabric Botanic is available in orange, blue, black and green. Due to a thin dim-out layer on the backside, the pattern remains clearly visible, also during the day. An exclusive designer look is created with a covered bottom rail and an Ultimate head-rail.

Discover a new dimension in window coverings with Honeycell. This one-of-a-kind collection of cellular fabrics stands out for its extensive choice in different fabrics, ranging from functional plain varieties, available in elaborate color palettes, to exclusive woven fabrics and stylish prints. The collection offers three cell sizes and different transparencies, including black-out varieties. All fabrics have a width of 300 cm. Due to their cellular structure, Honeycell fabrics have excellent insulating properties,

allowing them to help save energy in both winter and summer. Less heating and air conditioning is needed, which results in a healthier and more comfortable indoor climate. In addition, Honeycell fabrics are ideal noise-absorbers. New in the Honeycell collection is non-transparent fabric Oxford. The fabric has a natural linen-look. Its weaving structure gives this 25 mm cellular fabric a high-quality textile look and allows it to beautifully filter incoming light. Oxford is available in ten stylish, natural colors and has a white backing for additional light reflection.

Honeycell fabric Rioja is the perfect base for any functional collection. The fabric has a white backing and is available in 15 colors, each available in semi-transparent and black-out. Due to a silver coating on the inside Rioja black-out has optimal insulating properties. Rioja is available in a 25 mm and 45 mm single-cell variety as well as a 45 mm double-cell variety, offering the ideal fabric for any window size.

PALAZZO

Celebrate the richness of old times and decorate life with sophisticated ornaments with a modern twist. Renewed classical patterns come to life in deep, warm colors with a rich look and feel. Stylishness guaranteed.

Old places, cities and cultures are an endless source of inspiration for a timeless, classical style we call Palazzo. By reinterpreting old elements, we give the look a contemporary touch without losing its original elegance and stylishness.

With its classic, decorative and rich feeling our Heritage roller blind collection perfectly suits this style. For creating the fabrics for this collection, which are partly also suitable for panel blinds, we sought inspiration in the exquisite colors, patterns and textures presented in the antique Italian textile books in our archives. We interpreted them anew and made them of the now, while safeguarding their classical charm and richness.

Apart from refined floral motifs, the collection offers classic decorative and graphical patterns. We chose deep, classic colors, such as brown, dark red, gold and copper tones, and used metallic yarns in parts of the

collection for a slightly dramatic effect. The jacquards have a luxurious, baroque feeling that instantly lifts the interior. The warm colors create a feeling of intimacy in the interior.

The collection has been created around eleven color themes, varying from pure white to caramel and from dark raspberry to petrol and indigo. The fabrics feature details in the same or matching color tones, which makes them subtly decorative.

Translucent and dim-out varieties are also available. The backing of these dim-out varieties has been provided with a thin coating to ensure that the pattern and structure are also clearly visible in the daytime.

The fabrics in this collection are available in widths ranging from 250 to 280 cm, making them ideal for large windows.

Our Pure Wood collection for 50 mm Venetian blinds embodies timeless elegance. The wood has been finished with matte colors that suit modern as well as classic interiors. The look is modest and stylish at the same time. Pure Wood is available in 20 classical colors.

This exclusive pattern was inspired by the classical patterns of the Italian textile industry. They have a rich decorative feeling. The fabric is available in eight pastel color tones with a white dim-out backing and a soft, feminine effect. Nine darker colors with a black weft yarn and black dim-out backing represent an intimate and chic style. Jacquard Heritage is suitable for roller and panel blinds.

GET THE TOTAL LOOK

Hardware plays an instrumental part in the total look and feel of a roller blind. Our modular roller blind concept Absolute Roller Blind 2.0 offers hardware in different materials and finishing, available in 15 colors to match our extensive collection of fabrics and to suit

different interior design styles including several metallics. By combining fabric with hardware in a matching color scheme, the roller blind gets a total look that will definitely turn it into an eye catcher in your interior.

VINTAGE

Mix old and new and create an authentic, individual look.

Objects we collected during our travels over the world, mementos from the past and new design come together in an authentic, individual style.

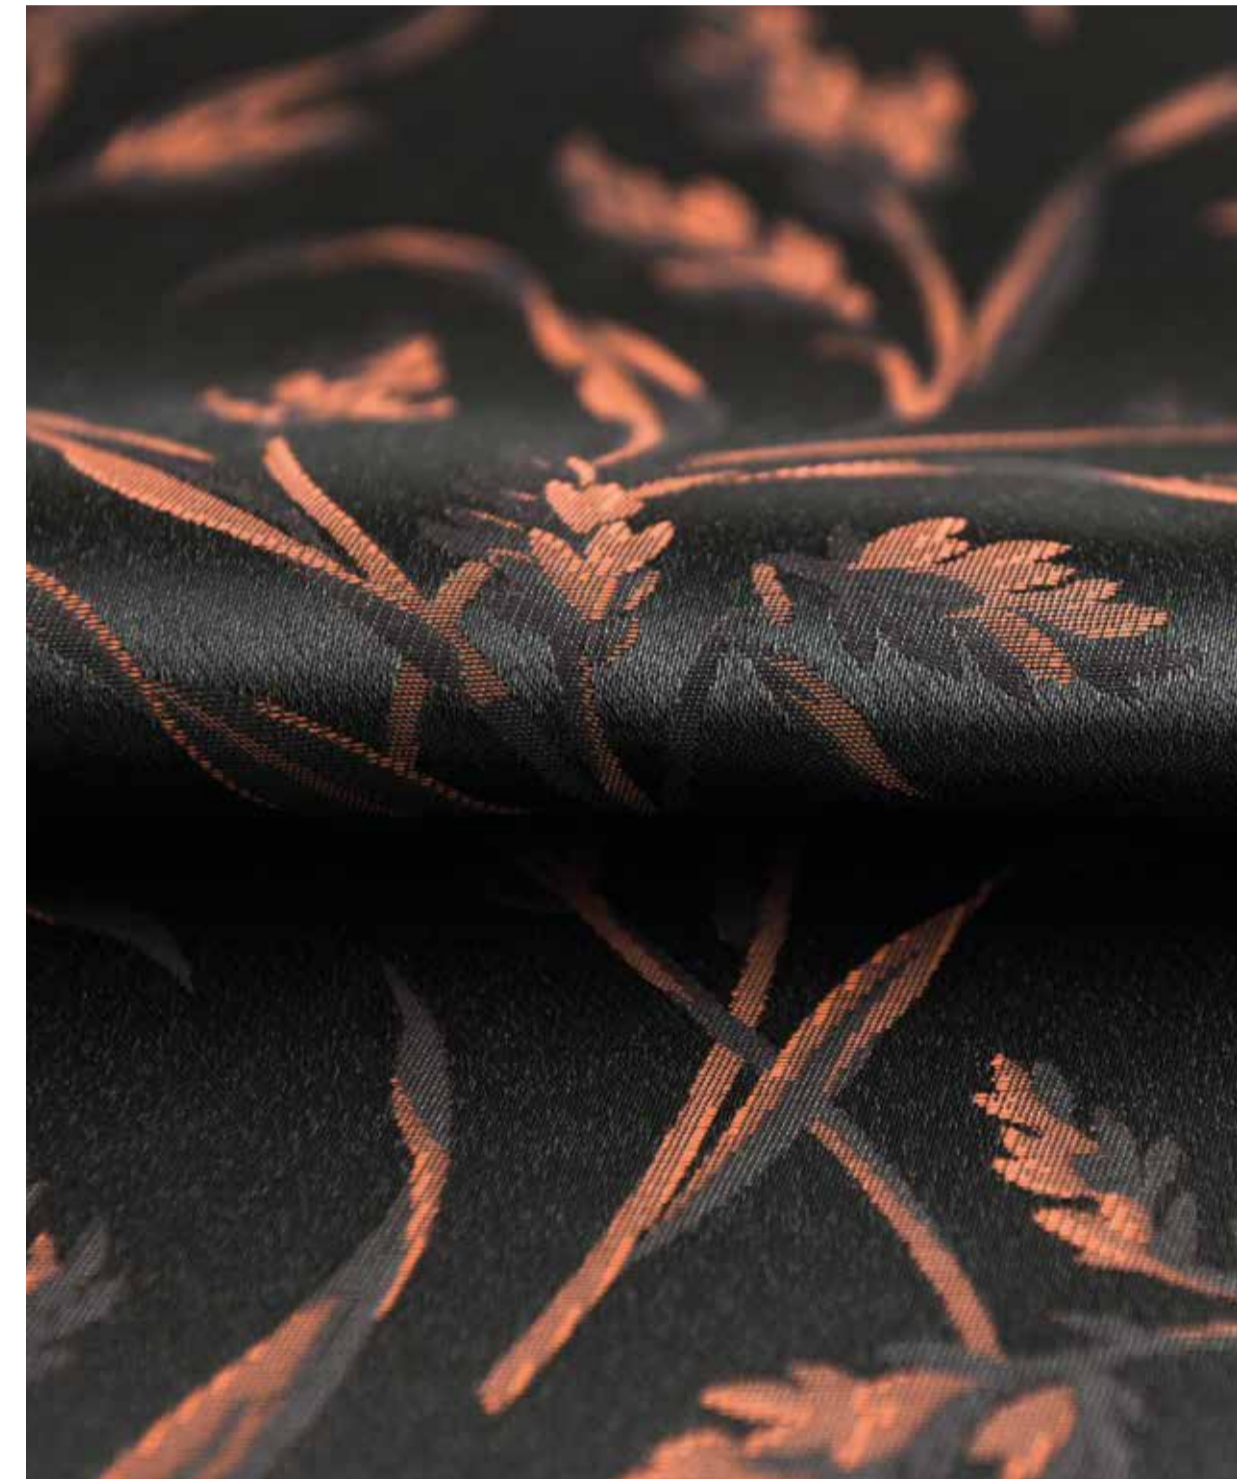

The vintage theme is hard to capture in a single word. It is all about combining the old with the new, about collecting and creating. The interior becomes an explosion of inspiration, a combination of cultures and adventures told through objects, modern design pieces, vintage accessories and artifacts. It becomes a personal museum, a testimony of a lifetime, representing a unique, authentic interior design style.

The Vintage theme is an invitation for you to let your

creativity run free. Natural textures and colors are combined with deep, warm earth tones, such as terra, brown and ochre, but also with authentic patterns. Although the look is natural at heart, it is elegant at the same time. Perfect for this style is a mix of roller blind fabrics from our Heritage, Botanic and luxury plain collection, which includes warm fabrics with a natural linen, cotton and wool look in different transparencies.

These 89 mm vertical strings add flair and an airy feeling to this semi-outdoor space. The strings have a flat weaving structure that ensures they hang perfectly. Due to their elegant, open structure they create a nice light filtering and privacy at the same time. It makes them the perfect room divider or window covering. The strings are available in an extensive palette of trendy colors.

Depending on the hardware color, the roller blind gets an entirely different look and feel. This composition is based on and inspired by the stainless steel components of this roller blind. The components have a

soft metallic finish in a chic champagne color tone. The combination of the material, design head and bottom rail, called Ultimate, and the delicate Botanic fabric makes a stylish centerpiece out of the roller blind.
