ABOUT COULISSE | INK

As Coulisse's official partner since 2016, Imaji Nata Kirana (INK) represents Coulisse, the European brand in window coverings, in Indonesia. Together we present a world of inspiring window coverings that offers endless possibilities for creating a personal space that stimulates well-being, productivity and comfort. In doing so, we are inspired by nature, design, fashion and architecture. With a seamless combination of fast-forward collections, innovative systems and motorization, we offer an ideal solution for any window covering situation for the residential as well as the project market.

OUR CONCEPT STORE

Since February 2019, we present a brand new store where all inspiration comes together in a total concept. The Coulisse Concept Store brought to you by INK gives the opportunity to experience an inspiring world of window coverings. We herewith gladly invite you to visit our store and discover all solutions we have to offer.

Our concept store is located at
Jalan Ahmad Dahlan no.22, Kebayoran Baru, Jakarta Selatan 12130, Indonesia
Meanwhile, all of Coulisse's blinds are carefully assembled at our factory at Cikeuting, West Java.

FOREWORD

It has been such interesting years that we have endured in global scale. The process that teaches us an amount of valuable experiences and forces us to see from different perspectives. For that reason, more responsible way of thinking emerges and also some habits are shifted.

The Living Beauty that Coulisse presents is such beautiful concept which align with INK values. Learning from what happen, as a company we also have significant responsibility for what we produce. And this new collection offers not only an exquisite range of new design fabrics that are inspired by nature and couture, but also offers good solutions for our environment. Sustainability is such a complex matters, yet every simple step could lead to bigger cause.

To combine with the collection, Coulisse creates Eve MotionBlinds battery motors, work with Apple HomeKit technology directly from your iPhone, without the need for a bridge. The pandemic teaches us that home is important. Therefore, smarter and more comfortable home are significant, and that could be reached with Eve MotionBlinds.

Since now home is most important aspect, nothing more crucial than excellent home design. The Colours of Indonesia 2022 in this September at Senayan City will answer that necessities. We are excited to be part of The Colours of Indonesia 2022 exhibition, to be part of smart and mind blowing design. We are thrilled to present smart window blinds for smart home and also to introduce the beauty of living with The Living Beauty collection.

Jenfilia Suwandrei Arifin
Director of INK

RF-SALVADOR-0200 White - Motorized system at Residence in Jakarta

LIVING BEAUTY

The Living Beauty concept originates from Coulisse’s ultimate source of inspiration: the beauty of the world. Rather than a stand-alone collection, Living Beauty is a concept that covers all by beauty inspired textiles of our existing collections and is expanded with new textiles.

As we want to be more thoughtful about what we add to this changing world, we take responsibility for our ecological footprint. This means we will focus on adding well-thought products to the Living Beauty concept throughout the year. Most of these additions are produced in a sustainable manner or made from recycled materials such as PET.

ECOLUXURY

RF-Richmond-0100 White - Absolute Roller 2.0 motorized with MOTION at Residence in Jakarta

OUR SUSTAINABLE ROLLER BLIND FABRICS

At Coulisse, we take responsibility for our ecological footprint. We focus on adding well-thought products to our collection. We choose materials that can stand the test of time, rather than fast-fashion. These products can either be made from recycled materials, produced in a more responsible way, or both, and will be marked with the EcoLuxury label. EcoLuxury can be categorized into four different pillars :

- Recycled yarns
- Eco produced
- Oeko-tex
- FSC paper

11

NEW ALLURE AND ESSENCE COLLECTIONS

Coulisse and INK carefully curates new fabrics from Coulisse's main collection for Indonesia's market. Therefore Coulisse INK will have new version Allure and Essence collections, which consists previous collection with additional more amazing new fabrics from The Living Beauty Collection. Coulisse and INK choose mostly Eco Luxury fabrics for this market, so the collections not just about beautiful looks but also beautiful for our environment too.

14

ANTIBES-0500 GREY ANTHRACITE

15

ANTIBES

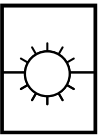

FOREVER CHIC

The Antibes collection is characterized by a square-patterned tweed look, inspired by the Italian feel and touch of iconic fashion brand designers. The fabrics are made of recycled yarns in a range of essential colors.

16

VALENCIA-0100 WHITE

17

VALENCIA

FEELING HOME

The Valencia collection includes sheer fabrics with a natural touch. The irregular texture of the yarns adds value to the refined fabrics, creating a soft and natural look.

THE COLOURS OF INDONESIA 2022

The Colours of Indonesia is the highly anticipated and inspiring design exhibition in Jakarta, Indonesia, masterminded by ID12 (12 Indonesian Interior Designers : Agam Riadi, Anita Boentarmen, Ary Juwono, Eko Priharseno, Joke Roos, Prasetio Budhi, Reza Wahyudi, Roland Adam, Sammy Hendramianto S, Shirley Gouw, Vivianne Faye, and Yuni Jie).

The Colours of Indonesia is an exhibition with a new concept. It emphasis on the design concept with ID12 designers' own interpretation of a world class exhibition.

The Colours of Indonesia takes place every two years at the atrium of Senayan City, Jakarta. This biennial exhibition presents different design concept in each edition. In 2014, the main theme of the Colours of Indonesia is residence. While in 2016, the exhibition is titled ' Hotel No.12; and in 2018, the even showcased ' Maison No.12 Designers Suites Apartment Show Unit'. In the past three editions, ID12 created special designs infusing Indonesia cultural heritage with their signature style.

And because of the current situation, finally TCOI will be held again in September 2022 with title TCOI Chapter V. The long four-year hibernation has made all of ID12 realise that change is the only constant in the society, especially when the pandemic hit and forced us to change the way we live. Humans are adapting to new rules and "the new normal", whether we like it or not, it has affected our lifestyle and way of life. These changes have challenged ID12 as designers to explore a new way of thinking in creating design that fits into "the new normal living".

In this Chapter V ID12 pours its creativities into the design of 12 rooms that reflects each designer's signature design style for a high-end residence. Consisting of two design style, modern and classic, the designers are fascinated to create a post-pandemic living space with a modern interpretation of Indonesian culture.

Coulisse INK will be part of Agam Riadi, Joke Roos, Prasetio Budhi, Sammy Hendramianto S and Yuni Jie's new design journey in TCOI chapter V.

AGAM RIADI

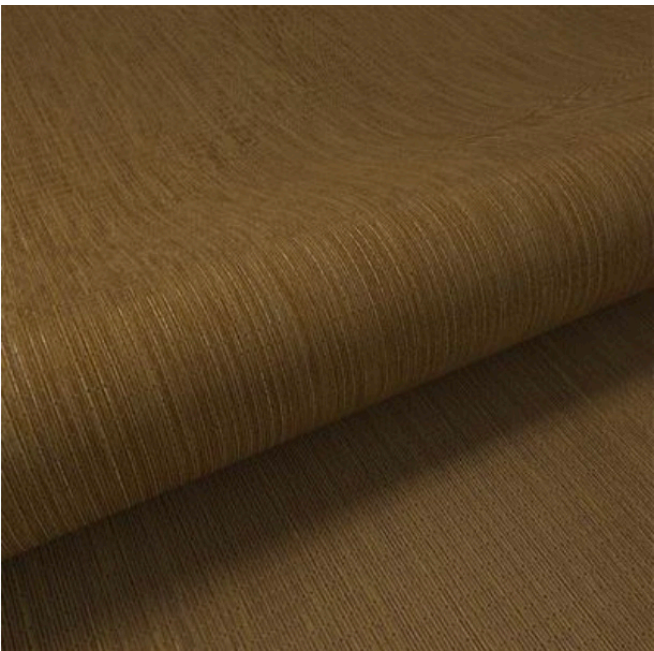

DIMENSI LIVING

INDOCHINE

Agam is designing classic pantry with Indochine feel, dominated by Asian Colors, black and red as the accent. In here, Agam creates outdoor ambience in the interior by utilizing tropical plants and using Asian style decorations.

SMART WINDOW COVERINGS FOR INDOCHINE

To match with the design, Roller Blinds with RF-Tokio- 0300 color Teak, transparent, woven nature fabric, made of natural materials, is chosen for the blinds because of its natural and tropical looks. It's operated by Eve MotionBlinds CM-03-E battery motors that could connect to HomePod or iPhone without any bridge, remote and pull.

WINDOW COVERING FABRIC :

WINDOW COVERING SYSTEM :

Motion EVE – CM-03-E operated by HomePod and pull

JOKE ROOS

STUDIO AIR PUTIH

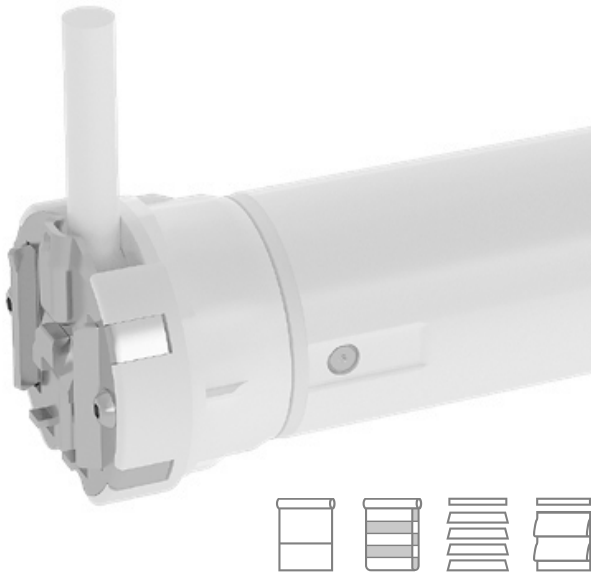

FLEXIBLE FUNCTION HOME LIBRARY

Known for her timeless and elegant design, Joke Roos never leans toward one particular design style. She chooses to focus on the needs and characters of her clients before deciding which style suit them best, as the property belongs to them. "Studio Air Putih has the flexibility to change its form depending on the spatial condition without losing its essence," she explains the philosophy behind her design studio, since in late 2000

Joke plans a home library with flexible function where parents can work from home while overseeing their children's online learning. This room is part of the Modern residence design with nature stone colour grey as her main inspiration. "The key of this room design is finding the yin and yang : functional for the adults, yet fun for children to study in."

SMART WINDOW COVERINGS FOR THE HOME LIBRARY

Coulisse's Motion, the high quality motorised system are chosen. Quite motor CM-09-QC and Curtain motor and track CM-35 will be part of the library. The motorised system will create more clean look compare to manual, that usually needs accessories to operate the blinds. With just simple remote, the curtains and roman window coverings will be easily operated.

WINDOW COVERING SYSTEM :

- 3 Sets Motorised Roman Track with CM-09-QC
- 1 Set Motorised Curtain Track Coulisse - Blackout with CM-35
- 1 Set Motorised Curtain Track Coulisse - Sheer with CM-35

PRASETIO BUDHI

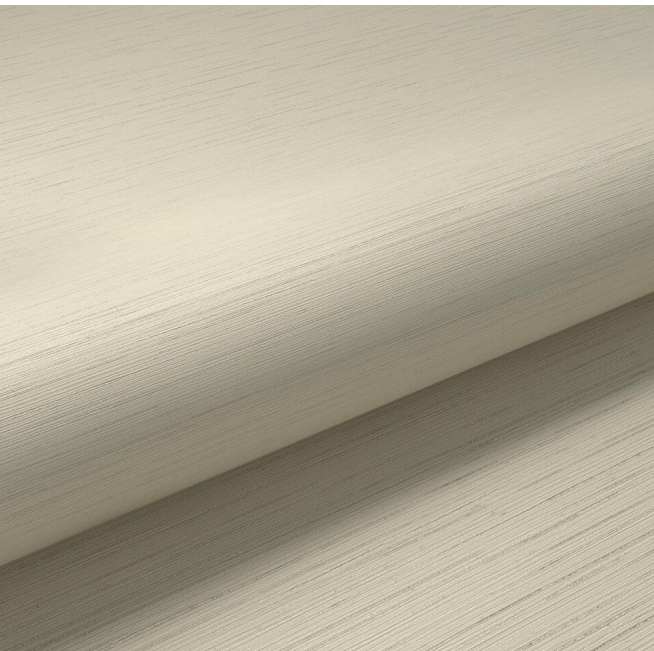

PLUS DESIGN

EFFORTLESS MODERN AND TEXTURE BEDROOM

For TCOI Volume 05, Prasetio Budhi creates a bedroom design with an effortless modern and texture. The bedroom will have similar color for finishing yet it will be enriched by creating a volume. For instance there will be chiseled console, and also at wall area there will be covered by wallpaper and added list with same color. So there will be sophisticated layer and texture created in this bedroom.

SMART WINDOW COVERINGS FOR THE BEDROOM

Roller blinds Narbonne fabrics with Sand/beige color will be utilized at the bedroom. Narbonne has texture that is suitable for the design. Therefore effortless texture also will be created at the window area. The roller blinds are operated by Eve MotionBlinds that could connect to HomePod or iPhone without any bridge, remote and pull.

WINDOW COVERING FABRIC :

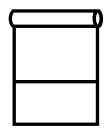

Roller blinds sheer with RF-NARBONNE-0300 Sand / Beige

26

MARAKEECH-0500 MIST

27

MARAKEECH

BEAUTIFUL NATURE

The Marrakech collection includes sheer fabrics with a linen look. The irregular yarns create a natural feeling, which is underlined by the elegant color palette of the collection.

SAMMY HENDRAMIANTO S

SHS

THE WORKING ROOM

Pandemic gives us a new experiences for all of us, one of new awareness that occurs is apparently we could work anywhere, not just in the office. The term Work from Home or WFH becomes popular in simultaneously with term of The New Normal.

Working at home is such an ideal choice. For that reason we have to create a comfortable working room, with great privacy and could fulfill the necessities, for an instance for online meeting or zoom meeting.

Therefore, in TCOI Vol 5, we present 2 working room concepts :

- Indoor; with working table
- Semi Outdoor; without table

Overall Design Idea from this working room are Classic, Unique, and Contemporary.

SMART WINDOW COVERINGS FOR THE WORKING ROOM

Contemporary is one of the aspect in The Working Room, therefore it uses the combination between Roller Blinds for sheer and Curtain to create the modernity.

New Fabrics Marakeech 0200 color Naturel, linen look sheer fabric with elegant color, nicely fits in the design. The roller blinds are operated by Eve MotionBlinds that could connect to HomePod or iPhone without any bridge, remote and pull.

WINDOW COVERING FABRIC :

Roller blinds sheer with RF-MARAKEECH-0200 Naturel

WINDOW COVERING SYSTEM :

Motion EVE – CM-03-E operated by HomePod and Pull

YUNI JIE

JIE DESIGN

MAISON BLANC

Casual Elegance is the design philosophy that Yuni Jie lives by when it comes to interior design. A believer in the balance of East & West, she loves both Japanese rustic simplicity and Scandinavian bare purity. The ability to edit and to know when to stop when designing something is definitely her core strength.

Her packed schedule does not stop her from participating in The Colours of Indonesia V together with her ID12 peers. She is excited to present the design of a foyer, powder room, and living room for the Modern Residence at TCOI exhibition. “Maison Blanc” is the main theme of her design; it will be adorned with all white and neutral hues. “White is a pure, cleansing, and poetic colour, so applying this shade in a modern room will echo ‘The Simplicity of White,’” she explains.

Yuni will enrich the space with a hint of traditional Indonesian elements by picking her new collaboration carpet collection with Kalimantan signature motif from Moire. Her subtle approach to ethnic weaving pattern will be shown in an elegant arrangement and still in line with the theme of understated hues. She strongly hopes this humble creation radiates a calming and peaceful effect, something we are after in this post-pandemic time. To pause, reflect, contemplate, cleanse and moving on with bright optimism. To breath elegance.

SMART WINDOW COVERING FOR MAISON BLANC

This time Yuni Jie chose to explore the use of printed screen for her living room area. She played with traditional Indonesian Kembang Tanjoeng motif which originated from Dayak Region. The simple graphic of this eight-angled pattern is indeed a mix of ethnic and contemporary look. The roller blinds are operated by Eve MotionBlinds that could connect to HomePod or iPhone without any bridge, remote and pull.

ULTIMATE EASE AND SAFETY

Smart window coverings powered by Eve MotionBlinds motors work with Apple HomeKit technology directly from your iPhone, without the need for a bridge, registration or any cloud dependency. Supported by Bluetooth and Thread, this is the most advanced and easy-to-use technology in the market..

EASY AND RELIABLE

Eve MotionBlinds supports Bluetooth and Thread. Simply scan the HomeKit Setup Code with your iPhone to connect Eve MotionBlinds, and create schedules to put your blinds on autopilot. Instead of relying on a cloud, all data and intelligence are stored locally, which means data exchanged in the home stays in the home. Controlling Eve MotionBlinds automatically and away from home requires a HomePod mini or an Apple TV (4th generation or later) as a home hub.

eve. | MOTIONBLINDS

SMART ECOSYSTEM

Eve MotionBlinds provide outstanding ease of use and advanced security. Once connected, window coverings powered by Eve MotionBlinds interact with other HomeKit-enabled accessories that are part of your ecosystem, like light bulbs and thermostats, creating the desired ambiance, safety and comfort at any time of day.

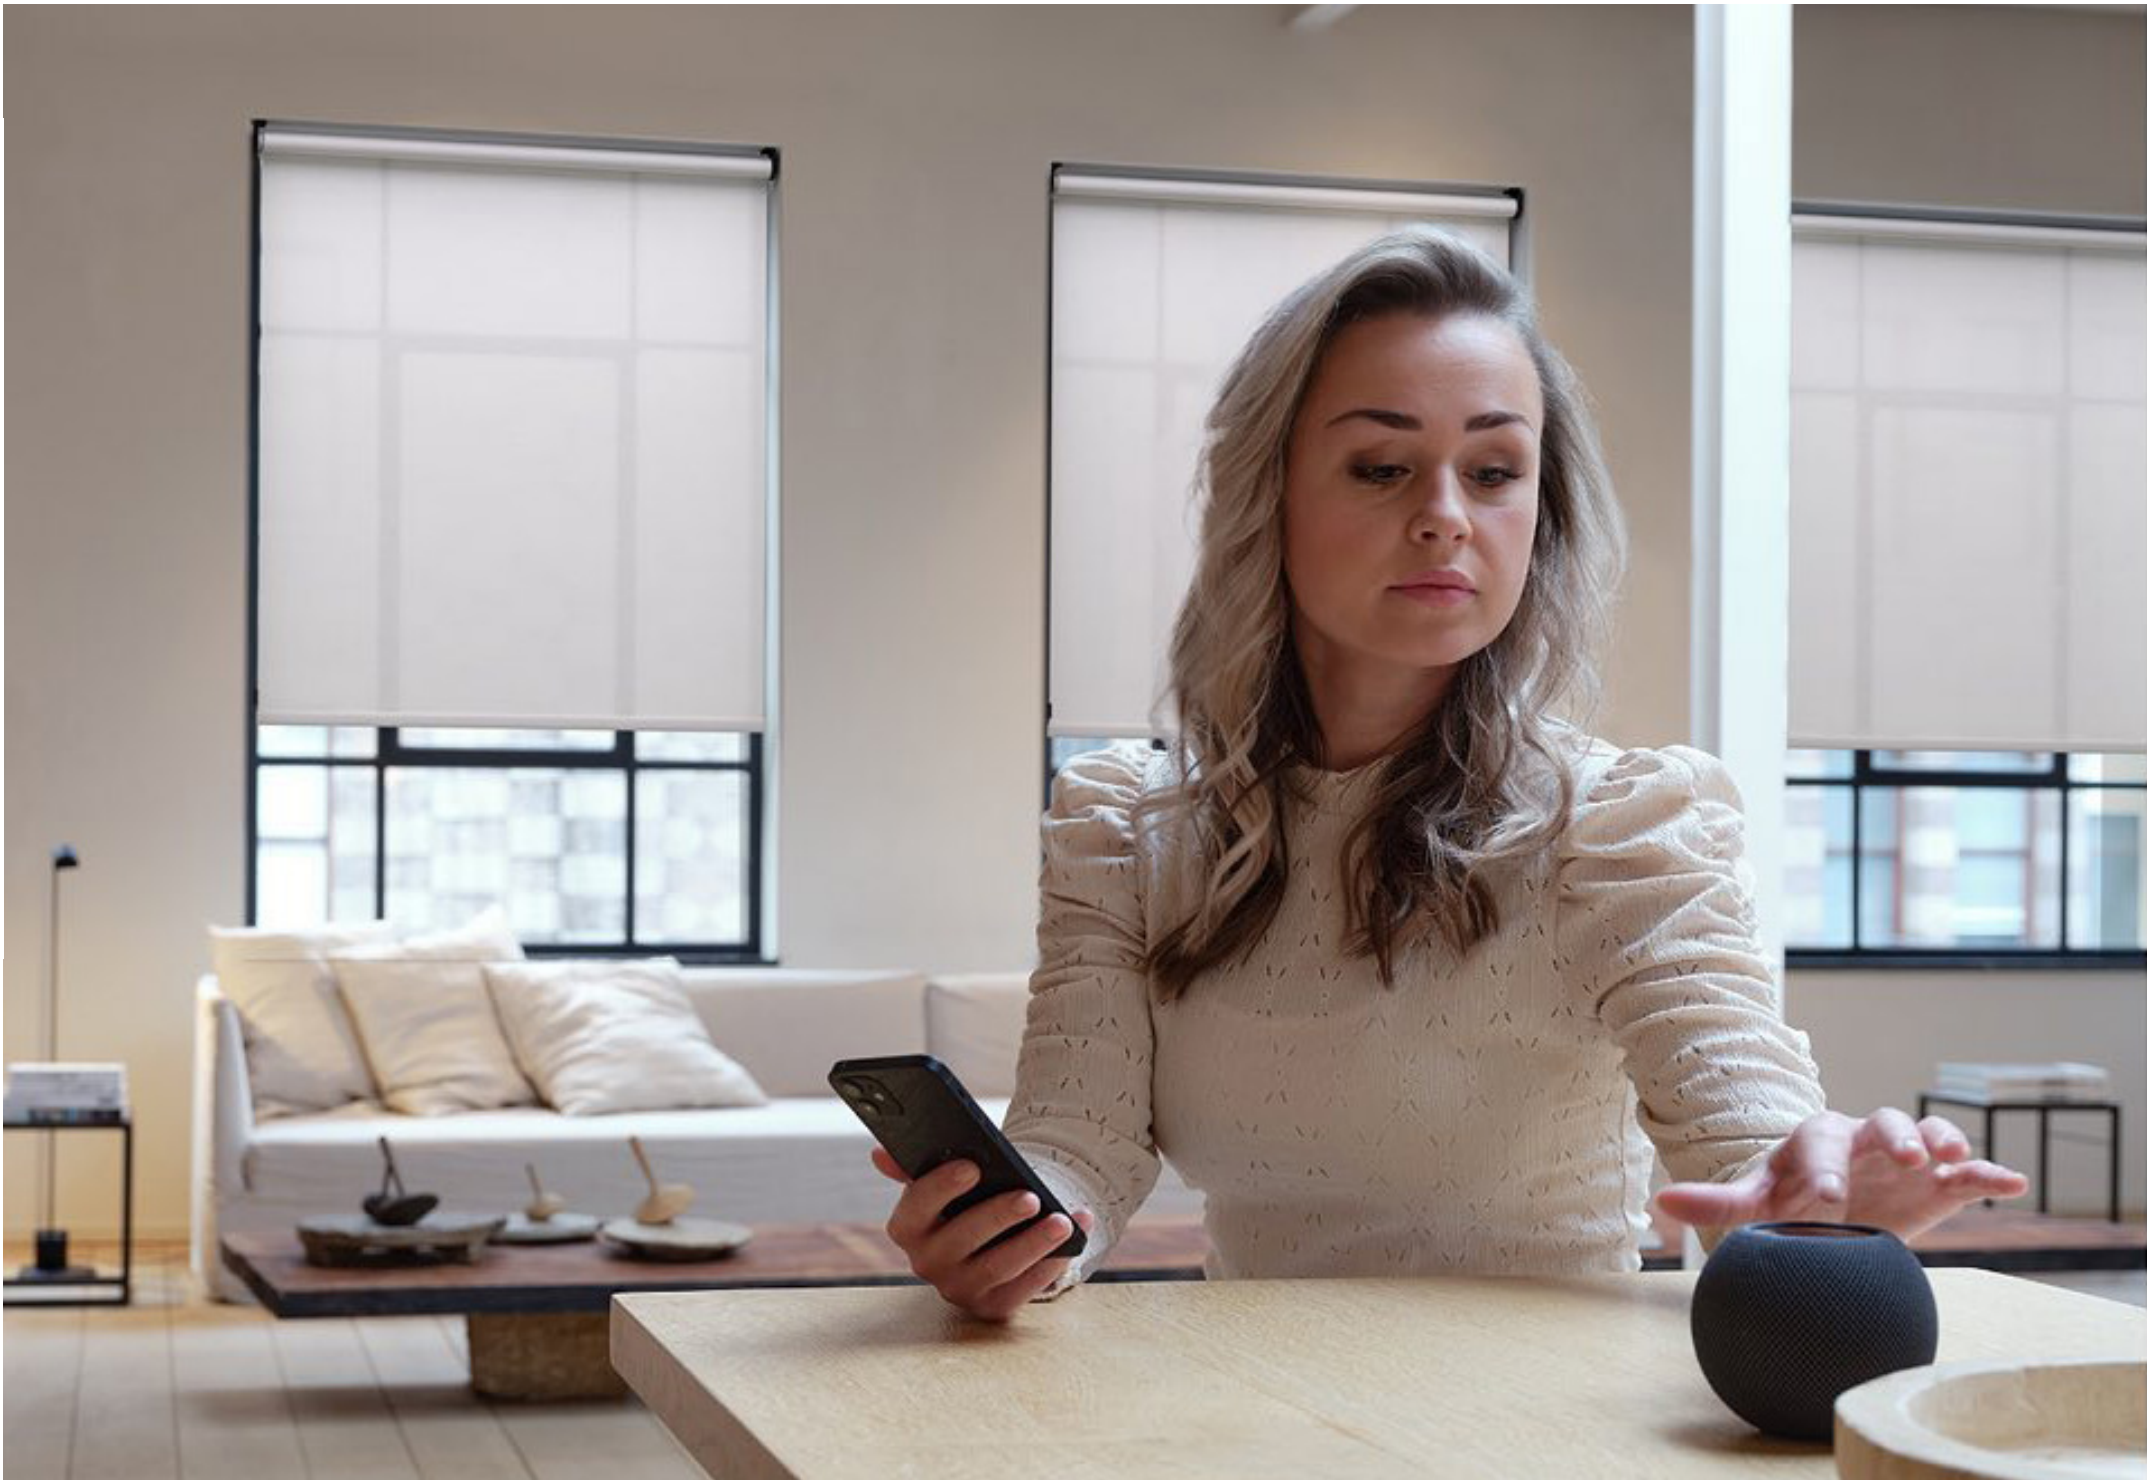

FUTURE-PROOF

Thanks to Thread, Eve MotionBlinds can work with Matter, the upcoming smart home standard that delivers full interoperability of smart home devices, regardless of the smart home system being used. Once Matter is being rolled out, Eve MotionBlinds will not only support Apple HomeKit, but also Alexa, Google, SmartThings, and others.

SMART LIVING

Welcome to the world of Eve MotionBlinds – the most advanced smart technology for window cover-ings that is going to revolutionize the smart home industry. With the support of Thread and soon Matter, this is the next must-have to complete any smart home.
